DE **Achtung:** Das neue Gerät darf nur von einem eingetragenen Experten montiert und angeschlossen werden.

Bitte halten Sie diese Verpflichtung ein. Anderenfalls entfällt bei auftretenden Schäden der Garantieanspruch.

Sicherheitshinweise für den Installateur

- In der elektrischen Installation ist eine Einrichtung vorzusehen, die es ermöglicht, das Gerät mit einer Kontaktöffnungsweite von min. 3 mm allpolig vom Netz zu trennen.
- Als geeignete Trennvorrichtung gelten z.B. Ausschalter, Sicherungen (Schraubsicherungen sind aus der Fassung herauszunehmen), Fehlerstrom-Schutzeinrichtungen und Schütze.
- Der Berührungsschutz muss durch die Montage gewährleistet sein.
- Die Standsicherheit des Einbaugeräts muss DIN 68930 entsprechen.
- Einbau-Backöfen und -Kochfelder verfügen über spezielle Anschlussysteme. Aus Sicherheitsgründen dürfen sie nur mit Geräten des gleichen Herstellers kombiniert werden.

EN **Attention:** The new appliance may only be installed and connected by a registered expert.

Please comply with this. If you do not, any damage resulting is not covered by the warranty.

Safety information for the installer

- The electrical installation is to be set up so that the appliance can be isolated from the mains with a minimum 3 mm all-pole contact separation.
- Suitable separation devices include e.g. cut-outs, fuses (screw fuses are to be taken out of the holder), RCD's and contactors.
- Anti-shock protection must be provided by the installation.
- The built-in unit must meet the stability requirements of DIN 68930.
- Built-in ovens and built-in cooking surfaces are fitted with special connection systems. For safety reasons, they must only be combined with appliances from the same manufacturer.

FR **Attention :** Le montage et le branchement de l'appareil sont du ressort exclusif de spécialistes agréés.

Veuillez respecter ces consignes. Dans le cas contraire, tout dommage dû à leur non-respect ne sera pas pris en compte par la garantie.

Consignes de sécurité pour l'installateur

- Lors de l'installation électrique, le branchement au secteur doit s'effectuer par le biais d'un dispositif à coupure omnipolaire ayant une distance d'ouverture des contacts d'au moins 3 mm afin que l'appareil puisse être isolé du courant secteur.
- Sont considérés appropriés des dispositifs d'isolement tels que disjoncteurs, fusibles (dévisser les fusibles de leur socle), disjoncteurs différentiels et contacteurs.
- La protection contre les chocs accidentels doit être assurée par l'installation.
- La stabilité de l'élément encastré doit être conforme à la norme DIN 68930.
- Les fours et plaques de cuisson encastrables sont équipés de connexions particulières. Par mesure de sécurité, vous devez uniquement les associer à des appareils du même fabricant.

IT **Attenzione:** La nuova apparecchiatura deve essere installata e collegata esclusivamente da personale qualificato.

Si prega di osservare questa indicazione, poiché in caso contrario si estingue qualsiasi diritto alla garanzia per i danni insorti.

Avvertenze di sicurezza per l'installatore

- È necessario realizzare un impianto elettrico in modo tale da poter isolare l'apparecchiatura dalla rete elettrica con una distanza minima di 3 mm tra contatti onnipolari.
- Dispositivi di separazione adatti includono: interruttori automatici, fusibili (i fusibili a vite devono essere tolti dal supporto), interruttori differenziali e contattori.
- La protezione contro il contatto diretto deve essere garantita dal tipo di installazione.
- La stabilità del mobile da incasso deve essere conforme alla norma DIN 68930.
- I forni e i piani cottura integrati sono provvisti di sistemi di collegamento speciali. Per motivi di sicurezza, è opportuno abbinare esclusivamente apparecchiature dello stesso costruttore.
